MISSION

By creating a climate of development for our business partners and the Matahari Spice Team, while using the latest know-how and state of the art machinery, we will establish a new quality standard in processed spices.

VISION

In 2030, Matahari Spice will be a leading spice distributor in US and Canada by combining over 25 years of processing know-how with a dynamic management system and high respect for Indonesian culture - we provide sustainable and traceable fairtrade practices - from the communities of farmers in Indonesia to our clients worldwide.

Matahari Spice is part of a dynamic group of companies that are responsable for the distribution of our products and customer service in the US and European markets.

Our product range includes top quality Organic and Conventional Indonesian Nutmegs, Mace, Cloves, Korintje Cinnamon, Turmeric, Black and White Pepper, Ginger and Vanilla, available in different quality calibrations or milled in all particle size upon requests.

We can provide competitive prices and a constant product quality due to our management system and strong partnerships with the local suppliers and farmers from Indonesia. An effective and efficient management system based on continuous improvement concept allows us to control the process parameters of our production. Our technology includes: Metal Detectors / Separators, Cryogenic Milling Systems, Fine Impact Milling Systems, Granulation And Cutting Mills, Sieving Systems, Roller Mills, Electrostatic Hair Remover Equipment, **3rd party validated Steam Sterilization Line in house and 3rd party validated ETO Sterilization Line in house** offering grounded spices in all requested mesh sizes.

Food safety is one of our responsabilities, therefore our factory implemented FSSC 22000, Kosher, Halal, as food safety management system.
